Established in 1951 by Frank Barnshaw, Angle Ring today celebrates over 70 years in business as one of the largest metal and alloy bending companies in the world. As a third generation, family-owned business, we take great pride in offering a high quality, personal service to all our customers.

We are proud to offer the UK's largest steel bending range from our single site production facility in Tipton, West Midlands, and are a key part of the supply chain for a wide range of key industry sectors in the UK and abroad.

Our vast range of bending machinery means we can offer the most suitable solution for your project, no matter how intricate or unique it may be. Regardless of whether your job consists of large or small components, or if it is a one-off requirement or a volume job, we can take on the bending of your plate, sections, bar, or tube in the most accurate and cost-effective way possible.

We offer a competitive service to a wide range of businesses and market sectors, from local engineering companies, through to large multi-nationals – and everything in between.

Bloomfield Road, Tipton, West Midlands, DY4 9EH, UK
